Professional Summary

Full Stack Developer with 2+ years building scalable backend services and frontend features using .NET Core (C#), Angular, and TypeScript. Experienced in REST API design and integration, SQL Server, unit testing, code reviews, and CI/CD pipelines (Azure DevOps, GitHub Actions) within Agile teams. A structured problem-solver who communicates technical concepts clearly. MSc in Secure Software Engineering (DCU). Dublin-based, full right to work (Stamp 1G) — no sponsorship required.

Technical Skills

- **Backend:** .NET Core (C#), ASP.NET MVC, Node.js, REST API design & integration, Microservices
- **Frontend:** Angular, React, TypeScript, JavaScript, HTML5, CSS, Bootstrap
- **Databases:** SQL Server (MSSQL), PostgreSQL, Oracle, MySQL, Relational Database Design
- **DevOps & Cloud:** Azure DevOps, GitHub Actions, CI/CD pipelines, Docker, Git, GitFlow, AWS (S3, Lambda, EC2), Azure
- **Testing & Practices:** Unit Testing, Code Reviews, TDD, Agile/Scrum, SDLC, Software Design Principles, LLM Integration, Prompt Engineering

Employment History

Intelliswift (an LTTS company) · Client: TENERITY / cxLoyalty — Pune, India Mar 2022 – Aug 2024
Full stack development on financial loyalty platforms (DataPal, Sentinel Gold, MyCreditTracker) — Visa/Mastercard processing, €5M+ annual revenue.

Associate – Software Aug 2023 – Aug 2024

- Analysed, built, tested and deployed scalable backend services ; REST APIs in .NET Core (C#) for the TENERITY Helix platform, standardising API contracts and cutting release cycle time by 40% across multiple releases.
- Developed and integrated Angular and TypeScript frontend features directly against .NET REST APIs, delivering customer-facing loyalty workflows end to end.
- Supported CI/CD pipelines in Azure DevOps for build, deployment, and testing, reducing manual deployment time by 25% and improving release reliability.
- Owned production incidents and resolution for live Visa/Mastercard loyalty modules, improving service reliability by performing root-cause analysis, debugging backend/frontend issues, coordinating fixes, and supporting release validation.
- Wrote unit and integration tests and contributed to code reviews, cutting post-release defect rates by 20% on live Visa/Mastercard modules.
- Optimised SQL Server queries across 5M+ customer records, delivering sub-second response through targeted indexing and schema redesign, working within Agile sprints (planning, stand-ups, retrospectives) alongside cross-functional product and compliance teams.

Campus Associate – Software Jun 2022 – Aug 2023

- Designed and delivered RESTful web services in .NET Core (C#) following MVC architecture, contributing 30+ scalable feature enhancements and building .NET UI components.
- Investigated and resolved backend and frontend defects across releases, applying structured problem-solving and shared coding standards.
- Maintained version control and Agile delivery using Git and JIRA.

Intern Mar 2022 – May 2022

Built a full stack web application (React, Node.js, TypeScript) deployed on AWS (EC2, S3), with software-testing methodologies to ensure reliability.

Education

MSc in Computing — Secure Software Engineering · Dublin City University (DCU), Dublin Sept 2024 – Oct 2025

- Modules: Secure Software Design, Applied Cryptography, Software Testing & Verification, Concurrent Programming.
- Thesis (distinction): Multimodal Sentiment Analysis — end-to-end Python/PyTorch ML pipeline, 85% accuracy across 20,000+ samples.

BE in Information Technology · Dr. D. Y. Patil College of Engineering, India Aug 2019 – Aug 2022

Projects

PaymentAPI Service | Python, FastAPI, Docker, AWS Lambda, GitHub Actions

Nov 2025 – Jan 2026

Built a production-ready REST API serving LLM-based predictions in under 200ms on AWS Lambda — Docker-containerised, with full unit-test coverage, a GitHub Actions CI/CD pipeline, and OAuth2/OpenID Connect security.

Awards & Certifications

iGoGetter Award - performance & Teamwork (Intelliswift) · HackerRank Python 4-Star · AZ-204 Azure Developer (in progress).
